

## Physical Security Interoperability Alliance

### PLAI Working Group Meeting Minutes December 9, 2015

---

Conference Call Details		(605) 475-4120	Access Code : 9173975
Australia	(08) 9520 3110	Netherlands	084 001 0003
Austria	0820 987601	South Korea	0160 -0-1073
Austria	0820 444599	United Kingdom	0844 410 0400 - 5p/min
Belgium	070 27 00 01	United Kingdom	8545508 - 15p/min
Germany	01805 016070 - 0.15€/min	United States	(605) 475-4120

#### Reminder of PSIA Operating Policy

##### *Antitrust*

The discussion should not address market allocation, pricing, or similar anticompetitive matters.

##### *Intellectual Property*

If a participant knows his or her company has patent claims that cover a portion of the spec or standard under discussion, he or she is obligated to disclose those claims, and the company must either agree to negotiate RAND (Reasonable and Non-Discriminatory) license terms or the WG will have to try to work around the claims (and the company may be asked not to participate further if this happens repeatedly).

---

#### Agenda:

1. Minutes of last meeting
2. ISC West 2016
3. General business
4. Next meeting/time

#### Attendance:

- Darren Bain, RightCrowd
- Dave Bunzel, PSIA
- Shayne Bates, Microsoft Global Security
- Josh Jackson, RightCrowd
- Steve Bell, Gallagher
- Jeffrey Longo, Kastle Systems
- Dave Adams, HID

#### Discussion:

- Meeting opened at 5:12pm EST
- The minutes from the previous meeting were reviewed and no questions were raised
- Darren advised that he had received no further feedback on the document that outlines the demonstration scenarios for ISC West 2016. There were no further ideas on the call

- Mohammad had previously indicated that there will be some changes to the PLAI specification to handle the demonstration scenarios we have been discussing and they need time to get these completed. Now that the demonstration scenarios are effectively planned, Darren asked Jeff how Kastle were progressing with this. Jeff advised that the meta-data streaming model specification changes have been presented to the Access Control workgroup and are under review. These changes will provide the support for the location-based East-bound interface activities within PLAI. Darren asked if there were plans in place for updating the PSIA PLAI Agent and Test Tools to meet the specification changes. Jeff advised discussions have taken place to start this work with Tridium in the New Year but there are no firm completion date plans yet. Jeff advised that work is also starting on slicing out the PLAI profiles as discussed on previous meetings. Darren advised that we will need to update the Implementation Guide in line with this at the appropriate time as well.
- David Bunzel asked Dave Adams from HID if there had been any progress on PLAI-based mobile credential support by HID. Dave advised that it has been discussed and he is seeking to get resources to progress that. He felt that with ISC West around the corner he may be able to use that as a driver to get those resources so that HID could be a part of the PLAI demonstration and discussions. Darren advised that it is possible for them to just carve out the part of the PLAI adapter implementation for them to have identity data flowing into their system from the PLAI agent and credentials being added and promoted back to the agent. Jeff confirmed this was possible and was in fact how Allegion provided their demonstration at the last ISC West show. Dave Bunzel asked when HID would need to have a solution ready to be a part of the ISC West demonstration and Darren advised that from a planning perspective having it ready by the end of January or early February would be ideal
- Shayne asked about organizing the location for our demonstration at ISC West and Dave Bunzel advised that we are fortunately already well advanced with Stanley Security sponsoring a request for space for us. Discussion amongst the group concurred that having the demonstration on the Thursday morning would be the best – time to be determined. Dave advised Debbie will request this with Stanley.
- Darren advised that the ISC West conference website indicated that there is a dedicated Connected Security Expo this year being promoted by the SIA. The theme of this is bringing logical and physical security together and is clearly somewhere that PSIA/PLAI need to be a part of. The URL for this is <http://www.connectedsecurityexpo.com/>. There is a webinar next week that Darren has registered to attend, and which anyone else in the meeting is invited to attend. There are also speaking spots and education sessions that we could look to be a part of. Further discussion on this is required after the webinar and at the next meeting.
- It was determined that there should be a check in status meeting in two week's time albeit that this was just before Christmas. This meeting should be scheduled for the Tuesday instead of the normal Wednesday.
- Meeting closed at 5:48pm EST

**New/Open Action Items:**

- (opened 11/11/2015) Mohammad/Jeff to continue to advise on the PLAI profiles and extensions progress

- (opened 8/19/2015) Dave Adams advised that HID are looking to follow the process and will advise when this might occur (a discussion was also held on getting another vendor who is already a part of the PLAI group to follow through the new implementation guide and process as a way of giving first hand feedback on the experience and if further changes could be made to improve it)

**Closed Action Items**

- (opened 11/11/2015) Dave and Darren to document the PLAI demonstration scenarios

**Next Meeting:** Tuesday 22nd December, 2015 5pm EST (India meeting to be scheduled for 8:30am PST the same day)
