Austria	0820 987601	South Korea	0160 -0-1073
Austria	0820 444599	United Kingdom	0844 410 0400 - 5p/min
Belgium	070 27 00 01	United Kingdom	8545508 - 15p/min
Germany	01805 016070 - 0.15€/min	United States	(605) 475-4120

#### Reminder of PSIA Operating Policy

##### *Antitrust*

The discussion should not address market allocation, pricing, or similar anticompetitive matters.

##### *Intellectual Property*

If a participant knows his or her company has patent claims that cover a portion of the spec or standard under discussion, he or she is obligated to disclose those claims, and the company must either agree to negotiate RAND (Reasonable and Non-Discriminatory) license terms or the WG will have to try to work around the claims (and the company may be asked not to participate further if this happens repeatedly).

---

#### Agenda:

1. Minutes of last meeting
2. Status update on revised CMEM specification and PLAI sub-profiles
3. ISC West 2016
4. General business
5. Next meeting/time

#### Attendance:

- Darren Bain, RightCrowd
- Laura Kevitt, Tridium
- Dave Bunzel, PSIA
- Josh Jackson, RightCrowd
- Jeffrey Longo, Kastle Systems
- Mohammad Soleimani, Kastle Systems

#### Discussion:

- Meeting opened at 5:06pm EST
- The minutes from the previous meeting were reviewed and no questions were raised
- Jeff advised that activities are now progressing with more intensity on the development activities around enhancing the PLAI agent to support zone information and location-based data streaming for 'east-bound' systems. There was also advice that the CMEM specification review was with Ken (this has been

in place since the middle of December) and that that needed to be followed up with. Mohammad suggested that a deadline of next Tuesday be put in place for that

- Technical work for Tridium with support from Kastle and the new Agent will need to commence soon to ensure the demonstration scenarios are correctly supported
- Jeff advised that there would be no printer/copier scenario included in the demonstration scenarios due to limitations on time to get this in place. Darren advised that the completed demonstration scenarios would now be revised to reflect that – these will be re-distributed for final review and agreement
- Stemming from this final review, Darren and Dave will work on copy for the PLAI Demonstration marketing section in the Events part of the PSIA website. The plan is to have this ready for review at the next PLAI meeting
- The question was raised about getting other PACS vendors involved in the demonstration. Mohammad indicated that the amount of software development required for any vendor who demonstrated at the last ISC West show to be able to also support the new location-based streaming would be pretty minimal (less than a week was the estimate). Dave was tasked with speaking to the PACS vendors about their involvement in the demonstration
- Dave confirmed that the room for ISC West PLAI demonstration has been confirmed (thanks)
- Dave asked for guidance on the conformant products part of the PLAI website. Darren suggested that, in line with previous discussion, we could either provide higher level Company | Product compliance detail e.g. Lenel OnGuard, without reference to specific versions. This would reduce the level of maintenance required for this conformant products list in the future. Discussion was also had around providing specific product version references. A web developer will be employed to make these changes for the site, but initially it was agreed that further follow up and investigation will be completed on how this could best be represented. Dave was also tasked with this initial research task
- A reminder to reach out to Dave Adams at HID for any progress on getting PLAI compliance built into their mobile devices for the ISC West demonstration (Dave if you are reading these minutes and can advise that would be great). Dave Bunzel will be reaching out in due course to check in on this as well.
- Darren was remiss in advising that we have submitted a speaking presentation slot for the Connected Security Expo at ISC West and are hopeful we will be able to present PLAI at this event
- Meeting closed at 5:53pm EST

#### **New/Open Action Items:**

- (opened 01/06/2016) Dave Bunzel to research how other companies represent their conformant products and how we might best represent them on the PLAI conformant product page
- (opened 01/06/2016) Dave Bunzel to follow up with Dave Adams on progress
- (opened 01/06/2016) Dave Bunzel to reach out to the PACS vendors about their participation in the ISC West demonstration with location-based streaming and the relevant scenarios
- (opened 01/06/2016) Darren to update the Demonstration Scenarios and re-distribute
- (opened 01/06/2016) Darren and Dave to draft the 'Save the Date for ISC West' PLAI demonstration section for the PSIA website events

- (opened 11/11/2015) Mohammad/Jeff to continue to advise on the PLAI profiles and extensions progress
- (opened 8/19/2015) Dave Adams advised that HID are looking to follow the process and will advise when this might occur (a discussion was also held on getting another vendor who is already a part of the PLAI group to follow through the new implementation guide and process as a way of giving first hand feedback on the experience and if further changes could be made to improve it)

**Closed Action Items**

**Next Meeting:** Tuesday 20th January, 2016 5pm EST (India meeting scheduled for 8:30am PST the same day)
