Physical Security Interoperability Alliance

PLAI Working Group
Meeting Minutes
July 20th, 2016

Conference Call Details		(605) 475-4120	Access Code : 9173975
Australia	(08) 9520 3110	Netherlands	084 001 0003
Austria	0820 987601	South Korea	0160 -0-1073
Austria	0820 444599	United Kingdom	0844 410 0400 - 5p/min
Belgium	070 27 00 01	United Kingdom	8545508 - 15p/min
Germany	01805 016070 - 0.15€/min	United States	(605) 475-4120

Reminder of PSIA Operating Policy
Antitrust
The discussion should not address market allocation, pricing, or similar anticompetitive matters.

Intellectual Property
If a participant knows his or her company has patent claims that cover a portion of the spec or standard under discussion, he or she is obligated to disclose those claims, and the company must either agree to negotiate RAND (Reasonable and Non-Discriminatory) license terms or the WG will have to try to work around the claims (and the company may be asked not to participate further if this happens repeatedly).

Special Note: Next meeting is July 27, 2016. This meeting will be a check in to follow up on the decisions reached in the meeting detailed below.

Agenda:
1. Minutes of last meeting
2. ASIS 2016 demonstration
3. Whitepapers
4. Conformance Process
5. General business
6. Next meeting/time

Attendance:
- Darren Bain, RightCrowd
- Dave Bunzel, PSIA
- Jeff Longo, Kastle Systems
- Josh Jackson, RightCrowd
- Laura Kevitt, Tridium

Discussion:
- Meeting opened at 5:02 PM EDT
- ASIS demonstration details
  - The ASIS demonstration will involve 2-3 PACS vendor hardware systems connected to the Kastle PLAI agent with an east-bound interface to

Tridium's software component. This will convert the badge read event to a BACnet call and will change the set point (visually) on a thermostat

- Assuming 2-3 PACS, the demonstration scenario would be that the thermostat set point will reduced accordingly each time someone checks in.
- Nominating one of the PACS as an exit point would demonstrate the capability to have people enter at one location that is being managed by one PACS and then being able to exit at another location that is being managed by a different PACS. Each time someone exits the set point of the thermostat can be increased proportionally until all people have exited
- Making the Internet available for the demonstration was discussed, however it needs to be tested using whatever technology is decided on (including purchasing the internet from the organizers)
- Kastle will provide infrastructure for the demonstration; Kastle typically require Internet access for the demonstrations however Jeff indicated that he could look to put their whole stack onto one beefed up laptop and this would obviate the need for Internet connectivity
- RightCrowd indicated that they are working to extend the PACS adapter they worked on with Microsoft to also provide event streaming. This would allow Lenel readers to be used, or alternatively PACOM or Tyco (based on previous demonstrations and subject to Dave's conversations with these companies about their involvement)
- Allegian were not on the call, but based on previous involvement in demonstrations and subject to them also exposing events to the PLAI agent, they could also be involved in the ASIS demonstration. Dave to follow up with Diane on this.

- Outstanding actions from the previous minutes
  - Conformant products – Darren asked Jeff if Kastle had been able to provide a copy of the Failed output, and/or prior Pass outputs for Debbie to use in her conformance efforts. Jeff advised he was still getting the release of those cleared and would advise on this at the next meeting.
  - Whitepapers
    - Dave to send the latest copy of the RightCrowd whitepaper email to Darren (who may have missed it while on leave) so that this can be progressed
    - Mohammad had delivered the draft of a whitepaper that outlined the PSIA/PLAI efforts and included details on both the technical architecture, as well as real-world examples
    - Dave to check with Diane on the Allegian whitepaper
- Other Business
  - A follow up meeting next week to be convened
- Meeting closed – 5:43pm EDT.

New/Open Action Items:
- (opened 07/20/2016) Dave to check with Allegian on the whitepaper content and also their involvement in the PLAI demonstration at ASIS

- (opened 07/20/2016) Jeff to deliver Fail and Pass conformance report example documents
- (opened 07/20/2016) Kastle to advise if they can deliver their part of the demonstration without Internet access
- (opened 07/13/2016) Checks on the 4g/Internet access at ASIS Orlando conference rooms to be investigated
- (opened 06/08/2016) Mohammad to provide a copy of the document that details the East-bound interface
- (opened 04/13/2016) Allegian to provide content summarizing what was presented at ISC West
- (opened 02/03/2016) Darren to work with Jeff on a short document outlining what is required to take an existing PLAI adapter and extend it to support Location/Zone Awareness

Closed Action Items
- (closed 04/13/2016) Kastle to provide content summarizing what was presented at ISC West

Next Meeting: Wednesday 27th July, 2016 5pm EDT
