

## **Physical Security Interoperability Alliance Specification Package Q12009**

### **Introduction**

This package contains the specifications relevant to all PSIA members and registrees as of Q1 2009. While the contents of this package are available as separate documents, it is expected at this time that all parties interested in the PSIA IP Media Device Specification will also require the PSIA Service Model. Both of these specifications are included in this package for convenience.

### **Instructions**

Simply extract the documents contained within this package. The IP Media Device Specification (IPMD) references the PSIA Service Model so it is suggested that the Service Model be required reading before attempting to implement the IPMD specification.

### **Expectations**

At this time, the .xsd documents intended to be posted in the PSIA's XML namespace are not fully vetted and are not online yet. When these are posted an announcement will be made via the PSIAForum and email to current registerees.

As this is version 1.0 of both the Service Model and the IPMD, corrections and additions are expected. In fact, several member companies have stated their intent to start implementations immediately. Changes to either the Service Model or the IPMD should be posted to the PSIA Forum at:

<http://forums.psialliance.org/>

If you are not registered, please go to the Log-In and do so. We will authorize your access to post within 24 hours.

### **Developer's Meeting**

In addition, the PSIA will be holding its first Developer's Meeting at 1:00 PM on March 31, 2009 at the Venetian in Las Vegas (scheduled to coincide with ISC-West 2009). At this meeting we will be collecting comments from anyone who has started implementation of the specification, setting the stage for version 1.1 of the spec, and discussing procedures and other targeted functional areas that the PSIA will address. If you would like to be part of this meeting, please RSVP to [info@psialliance.org](mailto:info@psialliance.org)

Please check the web site at [www.psialliance.org](http://www.psialliance.org) for updates.
