### PSIA Educates Industry on Benefits of Standards and IP-Based Technologies

The Physical Security Interoperability Alliance hosted an educational seminar in the Chicago area on June 24 to educate the security community on the benefits of IP standards and attract new companies to its ever-growing membership roster.

### Member Spotlight: Honeywell Security

As a member of PSIA, Honeywell strongly supports open architecture design, and its involvement in PSIA formalizes its commitment to developing interoperability that will bring IP solutions to market more quickly.
