THE PHYSICAL SECURITY INTEROPERABILITY ALLIANCE

A Monthly Newsletter December 2010

This Month's Features

Letter from the Executive Director
As we approach the end of the calendar year, we reflect on the significant progress made by PSIA. In addition to our camera spec (IPMD), we released a storage spec (Recording and Content Management: RaCM) and a video analytics spec (VAS). To complement these we introduced test tools for the IPMD spec and the RaCM spec and a conformance plan for VMS vendors. We have also released the Common Metadata and Events Model (CMEM), a critical component to allow the devices to communicate with each other. We have seen strong growth in companies that have downloaded the specs, implemented them into products, and gone through the conformance plans. This is affirmation that the industry understands the benefits of products that follow common specifications to achieve interoperability.

PSIA Presents Business Case for Systems Approach to Standards at China Security
The Physical Security Interoperability Alliance presented on the need for standards to attendees at China Security 2010. One of the important messages is that the market is shifting rapidly to IP products, which offer significant benefits in sharing critical security information. PSIA, with its systems approach to interoperability, is able to stage the industry for the integration of cameras, VMS, analytics, storage, access control and intrusion devices.

Member Spotlight: Mace Security International
Mace Security International, a developer of personal defense and electronic surveillance technologies, is dedicated to the standardization of IP-based security devices. The company believes that this standardization goes far beyond video products; rather, it encompasses all security subsystems including access control, intrusion detection, software, recording devices and video surveillance.

New Conformant Products

10 megapixel, H.264 color camera, AV10005
10 megapixel, H.264 day/night camera, AV10005DN

I/O device for IP CCTV integration, HWg-Juno 101
I/O device for IP CCTV integration, HWg-Juno 404

LG Electronics

IP Indoor Dome Camera, LDW2010
IP Fixed Camera, LSW2010
IP Fixed Camera, LSW900
IP Video Server, LVS201
IP Video Server, LVS301
IP Indoor Dome Camera, LVW700
IP Outdoor Dome Camera, LVW900
IP Camera, LVW901
IP Camera, LVW701
IP Camera, LVS311
IP Camera, LSW901
IP Camera, LW342
IP Camera, LW345
IP Camera, LW6424
IP Camera, LW6454
